

# Conflict Minerals Control Policy

## LT METAL

Gold or their derivatives, including tantalum, tin and tungsten, originating from the Democratic Republic of the Congo (DRC) and adjoining countries are sometimes mined and sold by armed groups to finance unfair labor practices or human rights violations. Some of these minerals and/or derivatives can make their way into the supply chains of the products used around the world. It is the policy of LT Metal to avoid conflict minerals that directly or indirectly finance or benefit armed groups from conflict-affected regions. As part of LT Metal's commitment to corporate responsibility and respecting human rights in our own operations and in our global supply chain, it is our LT Metal's goal to seek to only procure raw materials containing conflict minerals that does not support conflict.

In support of this sourcing policy, LT Metal will

- Exercise due diligence with relevant suppliers consistent with the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas and encourage our suppliers to do likewise with their suppliers.
- Provide, and expect our suppliers to cooperate in providing, due diligence information to confirm the conflict minerals in our supply-chain does not support conflict.
- Immediately discontinue engagement with suppliers who pose a reasonable risk to be supporting conflict.
- Iv. Commit to transparency in the implementation of this policy by making available reports on our progress to our customers, relevant stakeholders and the public as required.
